

PRODUCT CATALOGUE

Millano Group was established over forty years ago. The long period of its business operation helped to acquire wide production experience and excellence in combining ingredients to create unique chocolate taste compositions. Production is closely monitored and carried out on a continuous basis, using fully automated and electronically controlled closed equipment. The company owns three production plants and its machinery resources produce several hundred tons of end-products per 24 hours. Owing to such a wide scale, the company is able to operate on the domestic and many foreign markets. At present, Millano

cooperates with European and global distributors. Our care for ingredients emphasises the original taste of the wide range of pralines, chocolate and assorted chocolates with intense nuances of cocoa originating e.g. from Western Africa, including the Ivory Coast. The varied range of products, combined with state-of-the-art technology and passion of the team, makes Millano an important player on the market of chocolate products and confectionery in Poland and abroad.

Millano Group is a truly global player with a strong presence in Europe as well as an increasing footprint in Asia and the USA.

TEMPERED CHOCOLATE BARS
 · DARK · MILK · WHITE

USE

- coating of bakery and pastry products (sponge cake with jelly, biscuits, gingerbread)
- coating of confectionery products of various shapes: jellies, marshmallows, nut pulp blocks, slices
- coating of dried and candied fruit such as Californian prunes, apricots
- for coating of nuts and dried fruit and small confectionery products
- for making chocolate bars and other filled products
- for the manual preparation of chocolate decorations
- as an additive for chocolate mousses, ganache, creams for cakes and pastries

APPLICATION

- Liquefy chocolate: dessert chocolate at 50-55°C, milk chocolate and white chocolate at 45-50°C.
- Liquification: on an artisan scale on a water bath, where the temperature of the water in the bath should not exceed 65°C. Chocolate warmers (e.g. bemar type) can also be used for liquification.
- Temper the chocolate mixture.
- Use the tempered chocolate according to its purpose: forming bars, praline shells, coating pastry, bakery and confectionery products, preparing hand-made decorations (tubes, gratings, chocolate lettering or drawings).

STORAGE AND SHELF LIFE

Solidified form (bars): temperature 12-18°C, relative humidity RH<75%, 18 months for dessert and milk chocolates and 12 months for white chocolates, in intact packaging. Store in a dry, ventilated room, free from foreign odours, away from heat sources.

PRODUCT CHARACTERISTICS

Semi-finished chocolates are offered in several variants with different values for rheological properties, i.e. viscosity values and melt limits. Chocolate bars featuring moderate viscosity values and a low melting limit, are used for coating. Those with moderate values for viscosity and melting flow limit are used for shaping bars and spreading. As an addition to mousses or creams based on whipped cream or mascarpone.

CHOCOLATE POWDER

· MILK · DESSERT

USE

As ingredient:

- cakes and cookies (shortcakes, sponge cakes, gingerbread, brownie, marquise)
- cocoa and chocolate-flavoured ice cream mixes
- dairy products (milk desserts, yoghurt, cheese, chocolate milk, etc.)
- premixes for production of instant drinks
- confectionery toppings, ice-cream toppings, sauces, creams and fillings in cocoa and chocolate flavours
- as an additive to breakfast cereals such as stuffed pillows
- for the decoration of cakes, pies, desserts such as tiramisu, pralines, truffles

APPLICATION

Cocoa powder used in accordance with procedures appropriate to the specifications and conditions of the final product:

- in cakes and cookies combined with other bulk ingredients (flour, sugar)
- in dairy and ice cream products it is combined with dry ingredients and milk, which undergoes heat treatment (pasteurisation or sterilisation, depending on the type of product) and subsequent homogenization
- in fat-based confectionery semi-finished products combined with other dry ingredients (sugar, milk powder, whey, etc.)

STORAGE AND SHELF LIFE

Store cocoa powder in its intact packaging at 12-16°C and RH<75%, for 12 months. Store in a dry, ventilated area, free from foreign odours and away from heat sources.
